*Last few days 311 employees had to take two mandatory training classes that were only offered this week, and the lack of available agents resulted in longer wait time.*
LOS ANGELES COVID-19 WEEKLY DATA SNAPSHOT As of July 10, 2020*

*Testing data as of 7/9, hospital capacity data as of 7/8, new hospitalization data as of 7/17
*Data range is Saturday - Friday
*Hospitalizations include COVID-19 positive and COVID-19 suspected
Detailed Data Report
COVID-19 US Cases and Deaths
As of July 10, 2020 at 2:25PM

New York still has the most cases, but the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: **400.3K** cases in **New York State (+0.8K)** - **2048** per 100K
25.0K deaths in **New York State (+9)** - **127.8** per 100K

#2: **302.9K** cases in **California (+10.0K)** - **766** per 100K
6.9K deaths in **California (+139)** - **17.3** per 100K

#3: **244.2K** cases in **Florida (+11.4K)** - **1146** per 100K
4.2K deaths in **Florida (+92)** - **19.7** per 100K

#4: **240.1K** cases in **Texas (+9.8K)** - **836** per 100K
3.0K deaths in **Texas (+95)** - **10.5** per 100K

#5: **174.6K** cases in **New Jersey (+0.4K)** - **1960** per 100K
15.5K deaths in **New Jersey (+31)** - **173.8** per 100K

Rounding out the top ten are: **Illinois, Arizona, Georgia, Massachusetts, Pennsylvania**

**California ranks ...**
#2 in Cases  
#27 in Cases per 100K  
#6 in Deaths  
#29 in Deaths per 100K

Source: New York Times, using state and local health agencies, hospitals, CDC data, COVID tracking project, Johns Hopkins University
COVID-19 US Cases - Per Capita County Comparison (Counties >300K ppl)
As of July 9, 2020 (one day reporting lag)

Top 5 per capita (per 100K) cases by County:
Rockland, New York (NYC Metro Area): **4200 cases** per 100K
Westchester, New York (NYC Metro Area): **3636 cases** per 100K
Passaic, New Jersey (NYC Metro Area): **3388 cases** per 100K
Nassau, New York (NYC Metro Area): **3107 cases** per 100K
Union, New Jersey (NYC Metro Area): **2959 cases** per 100K

Los Angeles, California: **1245 cases** per 100K
(Los Angeles County ranks #59 out of 229 counties with 300K+)

Top 5 per capita (per 100K) deaths by County:
New York City, New York: **278.8 deaths** per 100K
Essex, New Jersey (NYC Metro Area): **257.8 deaths** per 100K
Passaic, New Jersey (NYC Metro Area): **242.3 deaths** per 100K
Union, New Jersey (NYC Metro Area): **241.0 deaths** per 100K
Hudson, New Jersey (NYC Metro Area): **219.7 deaths** per 100K

Los Angeles, California: **36.8 deaths** per 100K
(Los Angeles County ranks #79 out of 229 counties with 300K+)

Source: New York Times, using state and local health agencies, hospitals, CDC data, COVID tracking project, Johns Hopkins University
COVID-19 Los Angeles County Total Cases and Total Deaths, Past 7 Days
As of July 10, 2020, Noon

Key Takeaways:
Los Angeles County currently has a 2.9% mortality rate.

New cases number for 7/7 include around ~2K backlogged cases from a single lab covering the time period from 7/2-7/5. Results for 7/8 do not include results for this same lab.

Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19
Los Angeles County
Total New Cases
As of July 10, 2020, Noon

Key Takeaways:
The past seven days have seen an average daily increase of 2,447 new cases

The current case three-day average doubling rate is 39.1

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 Los Angeles County Total Case Increase
As of July 10, 2020, Noon

Key Takeaways
Yesterday saw a case increase of 2.1%

The past seven days have seen an average daily case increase of 2.1%

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 Los Angeles County Deaths
As of July 10, 2020, Noon

Key Takeaways:
The past seven days have seen an average daily increase of 40 new deaths.
The current death three-day average doubling rate of 48.9.

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 Los Angeles County Total Death Increase
As of July 10, 2020, Noon

Key Takeaways:
Yesterday saw a death increase of 1.3%

The past 7 days have seen an average daily death increase of 1.1%

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

Source: Los Angeles County Department of Health
COVID-19 Los Angeles County
Total Cases and Total Deaths, 7-Day Average
As of July 10, 2020, Noon

Key Takeaways:
The past seven days have seen an average daily increase of 2,447 new cases

The past seven days have seen an average daily increase of 40 new deaths

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
Cases:
Los Angeles vs. California
As of July 10, 2020, 1:00 PM

Key Takeaways:
• 10,023 new cases reported in CA since yesterday (3.4% increase)
• LA County has 42.04% of cases in CA with 2,667 new cases (2.1% increase)
• The City of LA has 17.65% of cases in CA with 834 new cases (1.6% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1.
Weekly Cases:
Los Angeles vs. California
As of July 10, 2020, 1:00 PM

Key Takeaways:
• 55,962 positive cases reported in CA from 7/4-7/10 (22.5% increase from previous week)
• 17,128 positive cases reported in LA County from 7/4-7/10 (0.1% decrease from previous week)
• 6,082 positive cases reported in the City of LA from 7/4-7/10 (<0.1% decrease from previous week)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times.
Deaths: Los Angeles vs. California
As of July 10, 2020, 1:00 PM

Key Takeaways:
• **139** new deaths reported in CA from 7/9 to 7/10 **(2.1% increase)**

• LA County has **54.5%** of deaths in CA with **51** new deaths from 7/9 to 7/10 **(1.3% increase)**

• The City of LA has **26.1%** of deaths in CA; **21** new deaths reported from 7/9 to 7/10 **(1.2% increase)**

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.
Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.
Weekly Deaths:
Los Angeles vs. California
As of July 10, 2020, 1:00 PM

Key Takeaways:
- 599 deaths reported in CA from 7/4-7/10 (32.8% increase from previous week)
- 281 deaths reported in LA County from 7/4-7/10 (34.4% increase from previous week)
- 115 deaths reported in the City of LA from 7/4-7/10 (32.2% increase from previous week)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times, with prior cases aggregated to day 1. LA City death count lags several days. Today’s CA death numbers do not include LA County.
COVID Cases and Death Demographics
As of July 8, 2020 (two-day lag)

Key Takeaways:
• Data is incomplete with 39.5% of cases and 0.5% of deaths still under investigation
• People 18-65 are overrepresented in cases
• Seniors, Men, Asian Americans, and African Americans are overrepresented in deaths
• 3,443 out of 3,689 deaths had comorbidities (underlying conditions) (93.3%)
