COVID-19 HEADLINES OF THE WEEK • August 10 - August 14

Russia Approves Coronavirus Vaccine Before Completing Tests
The country became the first in the world to approve a possible vaccine against the virus, despite warnings from the global authorities against cutting corners.

U.S. reports highest number of covid-19 deaths in one day since mid-May

Los Angeles County tops 5,000 coronavirus deaths

California becomes first state to pass 600,000 coronavirus cases

U.S. jobless claims fall below 1 million but remain high

The True Coronavirus Toll in the U.S. Has Already Surpassed 200,000

Pandemic has driven Americans to depression and drinking, CDC says

WASHINGTON — The coronavirus pandemic has led to a marked deterioration in Americans' mental health, according to a new Centers for Disease Control and Prevention study made public on Thursday. That study, which surveyed 3,412 Americans, found that 40.3% of respondents reported at least one adverse mental health impact as a result of the pandemic.
OS ANGELES COUNTY

Key Takeaways:
The following metrics have seen undesirable movement over the past seven days for which data are available: New Cases (vs baseline), Acute Care Bed Capacity (vs baseline), ICU Capacity (vs baseline), and Unemployment Insurance (vs baseline).

The following metrics have seen desirable movement over the past seven days: New Cases (vs last week), New Deaths, COVID Positive Test Rate (vs baseline), New Hospitalizations, Acute Care Bed Capacity (vs last week), ICU Capacity (vs last week), Unemployment Insurance (vs last week), and Crime.

Rounding out the top ten are: Illinois, Arizona, New Jersey, North Carolina, Louisiana.
COVID-19 US Cases - Per Capita County Comparison (Counties >300K ppl)

As of August 13, 2020, 3:00 PM • One-day lag

Top 5 per capita (per 100K) cases by County:

**Miami-Dade, Florida:** 5,189 cases per 100K
(140,984 total cases)

**Nueces, Texas:** 4,528 cases per 100K
(16,403 total cases)

**Rockland, New York (NYC Metro Area):** 4,289 cases per 100K
(13,973 total cases)

**Cameron, Texas:** 4,092 cases per 100K
(17,316 total cases)

**Westchester, New York (NYC Metro Area):** 3,758 cases per 100K
(36,357 total cases)

Los Angeles, California: 2,153 cases per 100K
(216,139 total cases)

Los Angeles County ranks #52 out of 229 counties with 300K+
COVID-19 US Deaths - Per Capita County Comparison (Counties >300K ppl)
As of August 13, 2020, 3:00 PM • One-day lag

Top 5 per capita (per 100K) deaths by County:

**New York City, New York**: 283.2 deaths per 100K
(23,610 total deaths)

**Essex, New Jersey (NYC Metro Area)**: 264.1 deaths per 100K
(2,110 total deaths)

**Passaic, New Jersey (NYC Metro Area)**: 247.5 deaths per 100K
(1,242 total deaths)

**Union, New Jersey (NYC Metro Area)**: 242.5 deaths per 100K
(1,349 total deaths)

**Hudson, New Jersey (NYC Metro Area)**: 224.3 deaths per 100K
(1,508 total deaths)

**Los Angeles, California**: 51.5 deaths per 100K
(5,171 total deaths)

Los Angeles County ranks #77 out of 229 counties with 300K+

---

Source: Los Angeles County Department of Public Health, Johns Hopkins University

Prepared by Mayor’s Innovation Team
Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate; the estimated infection rate is 0.86 (ideal is <1.0).

Note: New cases numbers since 7/23 are affected by data backlogs from certain labs, which can cause under-reporting on certain days, followed by over-reporting once results are received.
Key Takeaways:
The past seven days have seen an average daily increase of 2,123 new cases.

The past seven days have seen an average daily increase of 44 new deaths.
COVID Cases and Death Demographics*
As of August 12, 2020 • Two-day lag

Key Takeaways:
- Data is incomplete with 37.2% of cases and 0.3% of deaths still under investigation.
- People 40 and above are overrepresented in cases.
- Seniors, Men, Asian Americans, African Americans, and Hispanic/Latino Americans overrepresented in deaths.
- 4,792 out of 5,171 deaths had comorbidities (underlying conditions) (92.7%).

*Department of Public Health category Under Investigation or Not Otherwise Listed filtered out of analysis. Approximations are made on Census data to accommodate county age buckets. Percentage of cases and deaths under investigation is based on the race category.

Prepared by Mayor’s Innovation Team
Key Takeaways:
From 5/1 to 8/12

- Hispanic/Latino share increased by 10.8%
- White share decreased by 5.1%
- Asian share decreased by 3.5%
- Black share decreased by 2.0%
- Other Races share decreased by 0.3%
- Native Hawaiian/Pacific Islander share decreased by 0.2%
- American Indian/Alaska Native share increased by 0.1%
COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases
CASES

Key Takeaways:
• 7,934 new cases reported in CA since yesterday (1.3% increase)

• LA County has 36.38% of cases in CA with 2,642 new cases (1.2% increase)

• The City of LA has 14.90% of cases in CA with 996 new cases (1.1% increase)

City + County + State Update
As of August 14, 2020, 1:00 PM

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1

Prepared by Mayor’s Innovation Team
Key Takeaways:

• **44,828** positive cases reported in CA from 8/1-8/7 (23.0% decrease from previous week)

• **16,067** positive cases reported in LA County from 8/1-8/7 (20.4% decrease from previous week)

• **6,685** positive cases reported in the City of LA from 8/1-8/7 (16.8% decrease from previous week)

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 2,123 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.

Source: Los Angeles County Department of Public Health

Note: New cases numbers since 7/23 are affected by data backlogs from certain labs, which can cause under-reporting on certain days, followed by over-reporting once results are received.

Prepared by Mayor’s Innovation Team
Key Takeaways
Yesterday saw a case increase of 1.2%. The past seven days have seen an average daily case increase of 1.0%.
Key Takeaways:
As of 8/11, the 14-Day Case Rate per 100K residents (by episode date, with prison cases) was 304 based on available data. However, due to data issues beginning 7/23, the rate is more likely 310-330.

Note: The case rate was calculated by taking the case data per 100K residents by reporting date from the Los Angeles County Department of Public Health over the a 14-day period with a 3-day lag (e.g. the data for 8/6 run from 7/21-8/3). The main data shown for this report do not exclude prison cases though the difference is about 1 person per 100K.

The State waiver qualifying metric is defined as: “14 day case rate (without prison cases) - The total number of cases diagnosed and reported over a 14-day period divided by the number of people living in the county. This number is then multiplied by 100,000. Due to reporting delay, there is a 3-day lag. Although case rates are often calculated using the date they were reported to the health department, this measure uses the episode date. The episode date is the earliest of several dates and corresponds to the earliest date that the case can be known to have had the infection.”

Source: Los Angeles County Department of Public Health
Prepared by Mayor’s Innovation Team
Page 23

Note: It is expected that Los Angeles County has an actual case rate of 310-330 as of 8/10. However, due to CDPH system issues beginning around 7/23, the number of new cases are assumed to be under-reported. Once State data issues are resolved, the case number and case rate numbers will be adjusted as best as reasonably possible.
COVID-19 • LOS ANGELES COUNTY

New & Total Deaths
**Key Takeaways:**

- **188** new deaths reported in CA from 8/13 to 8/14 (1.7% increase)

- LA County has **47.4%** of deaths in CA with **43** new deaths from 8/13 to 8/14 (0.8% increase)

- The City of LA has **21.1%** of deaths in CA; **15** new deaths reported from 8/13 to 8/14 (0.7% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:
• **985** deaths reported in CA from 8/8-8/14 (2.1% decrease from previous week)

• **310** deaths reported in LA County from 8/8-8/14 (0.3% decrease from previous week)

• **85** deaths reported in the City of LA from 8/8-8/14 (16.7% decrease from previous week)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times. Day of outbreak is identified as March 11, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor's Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 44 new deaths.
Key Takeaways:
Yesterday saw a death increase of 0.8%

The past 7 days have seen an average daily death increase of 0.8%

Percent Increase in Total Deaths
Total Deaths

Source: Los Angeles County Department of Public Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 • LOS ANGELES COUNTY

Testing
Key Takeaways:
Since their respective minimums in late May:

LA County’s positive rate has **increased 1.9 percentage points** to 9.9%

LA City’s positive rate has **increased 2.8 percentage points** to 7.2%

Positive Test Rate (people tested positive rate) - Los Angeles City vs County (by Result Day) As of August 13, 2020 • One day lag

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.

Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive persons will not equal total cases because not all laboratories report results through ELR.
Key Takeaways:

- At least 1,130,818 tests have been performed at City of Los Angeles since 3/20.

- In LA County overall, at least 2,012,378 tests have been performed since 3/20.

- At least 9,892 tests were performed on 8/13.

- 77,482 of the 1,096,655 people for which results were received were positive (7.2%).

Note: Several testing sites were closed over the July 4th holiday weekend.

Source: City of Los Angeles

*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor’s Innovation Team

Page 31
Key Takeaways:
- The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%
- The overall positive testing reached its lowest rate of 4.3% on 5/31
- The current positive rate is 7.2% and stable
- The 7-day average positive rate 8.1% (as August 11, 2020)

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.
Key Takeaways:
• The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%
• The positive testing reached its lowest rate of 7.7% on 5/27
• The overall cumulative % positive persons tested as of 8/13 is 9.9%
• The overall cumulative % positive specimens tested as of 8/13 is 7.1%
• The 7-day average daily % positive persons as of 8/13 is 11.5%
• The 7-day average daily % positive specimens as of 8/12 is 6.4%

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.
Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.
- The overall cumulative % positive people tested as of 8/7 was 9.9%.
- The 7-day average daily % positive persons on 8/7 was 11.1%.

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive persons will not equal total cases because not all laboratories report results through ELR.
