COVID-19 Highlights

News Snapshot
Rise in jobless claims reflects still-struggling US economy

By CHRISTOPHER RUGABER  yesterday

FILE - In this May 2, 2020, file photo, a person looks inside the closed doors of the Pasadena Community Job Center in Pasadena, Calif., during the coronavirus outbreak. On Thursday, Aug. 20, the government reported that the number of workers applying for unemployment benefits fell back near February's last week after two months of decline. (AP Photo/Jae C. Hong)

*Testing data, hospital capacity data as of 8/20 and new hospitalization data as of 8/19

*Data range is Saturday - Friday
COVID-19 DATA SUMMARY

United States Update
California now has the most cases but in per capita cases, the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: **650.3K** cases in California (+5.6K) - **1644** per 100K  
**11.8K** deaths in California (+135) - **29.9** per 100K

#2: **593.3K** cases in Florida (+4.7K) - **2785** per 100K  
**10.3K** deaths in Florida (+118) - **48.4** per 100K

#3: **567.6K** cases in Texas (+5.0K) - **1977** per 100K  
**11.1K** deaths in Texas (+258) - **38.5** per 100K

#4: **428.5K** cases in New York State (+0.7K) - **2192** per 100K  
**25.3K** deaths in New York State (+3) - **129.4** per 100K

#5: **249.6K** cases in Georgia (+2.9K) - **2373** per 100K  
**5.0K** deaths in Georgia (+94) - **47.5** per 100K

Rounding out the top ten are: Illinois, Arizona, New Jersey, North Carolina, Louisiana

California ranks...

#1 in Cases  
#22 in Cases per 100K  
#3 in Deaths  
#28 in Deaths per 100K

Prepared by Mayor’s Innovation Team
Top 5 per capita (per 100K) cases by County:

**Miami-Dade, Florida:** 5,490 cases per 100K  
(149,162 total cases)

**Nueces, Texas:** 4,858 cases per 100K  
(17,600 total cases)

**Cameron, Texas:** 4,386 cases per 100K  
(18,559 total cases)

**Rockland, New York (NYC Metro Area):** 4,325 cases per 100K  
(14,089 total cases)

**Westchester, New York (NYC Metro Area):** 3,782 cases per 100K  
(36,586 total cases)

**Los Angeles, California:** 2,265 cases per 100K  
(227,346 total cases)

*Los Angeles County ranks #50 out of 229 counties with 300K+*
Top 5 per capita (per 100K) deaths by County:

**New York City, New York:** 283.5 deaths per 100K (23,639 total deaths)

**Essex, New Jersey (NYC Metro Area):** 264.3 deaths per 100K (2,112 total deaths)

**Passaic, New Jersey (NYC Metro Area):** 247.9 deaths per 100K (1,244 total deaths)

**Union, New Jersey (NYC Metro Area):** 242.7 deaths per 100K (1,350 total deaths)

**Hudson, New Jersey (NYC Metro Area):** 224.4 deaths per 100K (1,509 total deaths)

**Los Angeles, California:** 54.2 deaths per 100K (5,446 total deaths)

*Los Angeles County ranks #77 out of 229 counties with 300K+*
Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate. The estimated infection rate is 0.92 (ideal is <1.0)
Key Takeaways:
The past seven days have seen an average daily increase of 1,543 new cases

The past seven days have seen an average daily increase of 42 new deaths

---

**Source:** Los Angeles County Department of Public Health, COVID Tracking Project

*Missing cases/deaths data by demographic from 7/2-7/3

Prepared by Mayor’s Innovation Team
Key Takeaways:
• 5,585 new cases reported in CA since yesterday (0.9% increase)

• LA County has 35.22% of cases in CA with 1,759 new cases (0.9% increase)

• The City of LA has 14.27% of cases in CA with 693 new cases (0.8% increase)
Key Takeaways:

- **49,261** positive cases reported in CA from 8/15-8/21 (22.1% decrease from previous week)

- **10,801** positive cases reported in LA County from 8/15-8/21 (27.3% decrease from previous week)

- **3,958** positive cases reported in the City of LA from 8/15-8/21 (61.1% decrease from previous week)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11, with prior cases aggregated to day 1

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 1,543 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.
Key Takeaways
Yesterday saw a case increase of 0.8%. The past seven days have seen an average daily case increase of 0.7%.
Key Takeaways:
As of 8/18, the 14-Day Case rate per 100K residents (by episode date, with prison cases) was 275 based on available data. However, due to data issues beginning 7/23, the rate is more likely 280-320.

Note: The case rate was calculated by taking the case data per 100K residents by reporting date from the Los Angeles County Department of Public Health over the a 14-day period with a 3-day lag (e.g., the data for 8/6 run from 7/21-8/3. The main data shown for this report do not exclude prison cases though the difference is about 1 person per 100K.

The State waiver qualifying metric is defined as: “14 day case rate (without prison cases) - The total number of cases diagnosed and reported over a 14-day period divided by the number of people living in the county. This number is then multiplied by 100,000. Due to reporting delay, there is a 3-day lag. Although case rates are often calculated using the date they were reported to the health department, this measure uses the episode date. The episode date is the earliest of several dates and corresponds to the earliest date that the case can be known to have had the infection.”

Source: Los Angeles County Department of Public Health

Prepared by Mayor’s Innovation Team

Note: It is expected that Los Angeles County has an actual case rate of 290-320 as of 8/18. However, due to CDPH system issues beginning around 7/23, the number of new cases are assumed to be under-reported. Once State data issues are resolved, the case number and case rate numbers will be adjusted as best as reasonably possible.
COVID-19 • LOS ANGELES COUNTY

New & Total Deaths
Key Takeaways:

- **135** new deaths reported in CA from 8/20 to 8/21 (**1.2%** increase)

- LA County has **46.5%** of deaths in CA with **45** new deaths from 8/20 to 8/21 (**0.8%** increase)

- The City of LA has **20.4%** of deaths in CA; **13** new deaths reported from 8/20 to 8/21 (**0.5%** increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- 825 deaths reported in CA from 8/15-8/21 (16.2% decrease from previous week)

- 291 deaths reported in LA County from 8/15-8/21 (6.1% decrease from previous week)

- 99 deaths reported in the City of LA from 8/15-8/21 (16.4% increase from previous week)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 42 new deaths.

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:
Yesterday saw a death increase of 0.8%.

The past 7 days have seen an average daily death increase of 0.7%.

Source: Los Angeles County Department of Public Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 • LOS ANGELES COUNTY Testing
Key Takeaways:
Since their respective minimums in late May:

LA County’s positive rate has increased 1.8 percentage points to 9.8%

LA City’s positive rate has increased 2.9 percentage points to 7.2%

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- At least 1,192,134 tests have been performed at City of Los Angeles since 3/20.
- In LA County overall, at least 2,136,243 tests have been performed since 3/20.
- At least 8,279 tests were performed on 8/20.
- 82,079 of the 1,162,110 people for which results were received were positive (7.2%).
- NOTE: Several testing sites were closed over the July 4th holiday weekend.

*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor’s Innovation Team
Page 31
Key Takeaways:

- The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%
- The overall positive testing reached its lowest rate of 4.3% on 5/31
- The current positive rate is 7.2% and stable
- The 7-day positivity rate (as of 8/18) is 7.0%

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- The overall cumulative % positive persons tested as of 8/20 is 9.8%.
- The overall cumulative % positive specimens tested as of 8/20 is 6.9%.
- The 7-day average daily % positive persons as of 8/20 is 10.6%.
- The 7-day average daily % positive specimens as of 8/20 is 5.6%.

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
**Key Takeaways:**

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.
- The overall cumulative % positive people tested as of 8/14 was 9.8%.
- The 7-day average daily % positive persons on 8/14 was 10.4%.

---

**Source:** Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.
COVID-19 • LOS ANGELES COUNTY
Hospitalizations
Key Takeaways:

- **1,280** currently hospitalized patients
- Since 8/14, there has been a -5.7% decrease in hospitalized patients

Source: California Open Data Portal

*Hospitalizations in county press conferences often reported with two-day lag
**There are additional patients in hospitals that are COVID-19-suspected
Key Takeaways:

- At least **16,524 people** have been hospitalized since 3/18
- **108 new hospitalizations*** as of 8/19 (0.7% increase)

*No new hospitalizations update for 7/31

Source: County HavBed Bed Tracking and Los Angeles County Department of Public Health, COVID Tracking Project

Prepared by Mayor’s Innovation Team

Page 37
Key Takeaways:

- An average of **105 people** were hospitalized daily due to COVID-19 between 8/12-8/19

- The new 7-day rolling average **decreased by 12.5%** compared to last week’s average
Key Takeaways:
695 total beds

Since last week, there has been a:
- **20.4% increase** in available acute care beds. Surge capacity is 11,482
- **15.6% decrease** in available ICU beds. Surge capacity is 4,067
- **5.1% decrease** in available ventilators. Surge capacity is 3,199
