County Projections
This update includes data on hospital visits and volume through June 25, 2020.

**KEY TAKEAWAYS:**

- The number of new patients with COVID-19 requiring hospitalization across Los Angeles County has increased substantially. This is a change in the trajectory of the epidemic.

- The effective transmission number (“R”) is now estimated to be **1.26**, with an uncertainty of **1.13 to 1.41**, reflecting increased transmission that occurred 2 to 4 weeks ago.

- This increase in transmission is, in a general way, due to greater mixing of individuals who are still susceptible to infection in a manner that facilitates exposure (e.g., close physical proximity without the use of a mask or facial covering).

- If the trajectory continues, the current number of available ventilators in Los Angeles County is most likely adequate over the next 4 weeks. The current number of available hospital beds may become inadequate in the next 2 to 3 weeks. The number of ICU beds—our most limited resource—is likely to become inadequate in the near future. Both situations will require hospitals to implement their surge plans to accommodate the additional expected patient demand.

**HOW MANY IN LOS ANGELES ARE INFECTIOUS TO OTHERS?**

The model suggests that about 0.71% (uncertainty of 0.43% to 1.16%) of everyone in Los Angeles County is currently infected and infectious to others.

This suggests about 1 in 140 (between 1 in 90 and 1 in 230) Los Angeles County residents are currently infectious to others. Last week this estimate was 1 in 400.

A typical large busy store is likely to have multiple infectious persons enter and shop every day.

The COVID-19 epidemic in Los Angeles County is affecting a younger population, on average, than before.

Source: Los Angeles County Department of Health
Effective Transmission Number “R”

Note: We have adjusted the R that we present to take into account the fraction of the population that is presumed to be immune to reinfection. At the beginning of the pandemic, this fraction was essentially zero so this would not have made any difference. But as more people have been infected, and are presumed to have immunity, we are presenting an R that includes this factor.

Detailed Data Report
As of June 28, 2020 at 2:25PM

COVID-19 US Cases and Deaths

New York still has the most cases but the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: 392.9K cases in New York State (+0.4K) - 2010 per 100K
24.8K deaths in New York State (+7) - 127.1 per 100K

#2: 215.6K cases in California (+4.8K) - 545 per 100K
5.9K deaths in California (+31) - 15.0 per 100K

#3: 171.3K cases in New Jersey (+0.1K) - 1922 per 100K
15.0K deaths in New Jersey (+17) - 168.3 per 100K

#4: 153.0K cases in Texas (+4.3K) - 533 per 100K
2.4K deaths in Texas (+10) - 8.4 per 100K

#5: 146.3K cases in Florida (+5.3K) - 687 per 100K
3.5K deaths in Florida (+28) - 16.6 per 100K

Rounding out the top ten are: Illinois, Massachusetts, Pennsylvania, Georgia, Arizona

California ranks ...
#2 in Cases
#32 in Cases per 100K
#7 in Deaths
#29 in Deaths per 100K

Source: New York Times, using state and local health agencies, hospitals, CDC data, COVID tracking project, Johns Hopkins University
Illinois did not report its death totals in time for this publication
COVID-19 US Cases - Per Capita County Comparison (Counties >300K ppl)
As of June 28, 2020 (one day reporting lag)

Top 5 per capita (per 100K) cases by County:
- **Rockland, New York** (NYC Metro Area): 4167 cases per 100K
- **Westchester, New York** (NYC Metro Area): 3595 cases per 100K
- **Passaic, New Jersey** (NYC Metro Area): 3361 cases per 100K
- **Nassau, New York** (NYC Metro Area): 3077 cases per 100K
- **Union, New Jersey** (NYC Metro Area): 2942 cases per 100K

**Los Angeles, California**: 975 cases per 100K
(Los Angeles County ranks #60 out of 229 counties with 300K+)

Top 5 per capita (per 100K) deaths by County:
- **New York City, New York**: 269.5 deaths per 100K
- **Essex, New Jersey** (NYC Metro Area): 252.9 deaths per 100K
- **Union, New Jersey** (NYC Metro Area): 238.2 deaths per 100K
- **Passaic, New Jersey** (NYC Metro Area): 235.3 deaths per 100K
- **Hudson, New Jersey** (NYC Metro Area): 215.5 deaths per 100K

**Los Angeles, California**: 32.9 deaths per 100K
(Los Angeles County ranks #81 out of 229 counties with 300K+)

COVID-19 Los Angeles County Total Cases and Total Deaths, Past 7 Days
As of June 29, 2020, Noon

Key Takeaways:
Los Angeles County currently has a 3.3% mortality rate and an Infection Growth Rate of 1.04 (goal = btw .5 and 1)

Source: Los Angeles County Department of Health, COVID ActNow
Key Takeaways:
The past seven days have seen an average daily increase of 2,151 new cases

The current case three-day average doubling rate is 26.9

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers
Key Takeaways
Yesterday saw a case increase of 2.9%

The past seven days have seen an average daily case increase of 2.3%
COVID-19 Los Angeles County Deaths
As of June 29, 2020, Noon

Key Takeaways:
The past seven days have seen an average daily increase of 29 new deaths.
The current death three-day average doubling rate of 117.4.

Cases: Los Angeles vs. California
As of June 29, 2020, 1:00 PM

Key Takeaways:
• 4,760 new cases reported in CA since yesterday (2.4% increase)

• LA County has 46.74% of cases in CA with 2,903 new cases (2.9% increase)

• The City of LA has 20.5% of cases in CA with 1,221 new cases (2.8% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1.
Deaths: Los Angeles vs. California
As of June 29, 2020, 1:00 PM

Key Takeaways:
• 31 new deaths reported in CA from 6/28 to 6/29 (0.5% increase)
• LA County has 56.0% of deaths in CA with 22 new deaths from 6/28 to 6/29 (0.6% increase)
• The City of LA has 27.3% of deaths in CA; 10 new deaths reported from 6/28 to 6/29 (0.6% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.
COVID Cases and Death Demographics
As of June 27, 2020
(two day lag)

Key Takeaways:
• Data is incomplete with 35.2% of cases and 0.5% of deaths still under investigation
• People 18 and above and Hispanic/Latinos are overrepresented in cases
• Seniors, Men, Asian Americans, and African Americans are overrepresented in deaths
• 3,101 out of 3,305 deaths had comorbidities (underlying conditions) (93.8%)

Source: Los Angeles County Department of Public Health, US Census Bureau
*Department of Public Health category Under Investigation or Not Otherwise Listed filtered out of analysis
Approximations are made on Census data to accommodate county age buckets. Percentage of cases and deaths under investigation is based on the race category
Share of LA County Deaths by Race
As of June 27, 2020 (two day lag)

Key Takeaways:
From 5/1 to 6/27

• Hispanic/Latino share increased by 4.4%
• White share decreased by 1.6%
• Asian share decreased by 1.8%
• Black share decrease by 0.7%
• Other Races share decreased by 0.3%
• Native Hawaiian/Pacific Islander share decreased by 0.2%
• American Indian/Alaska Native share increased by 0.2%

Source: Los Angeles County Department of Health
Cases & Deaths by Age
As of June 27, 2020
(two day lag)

CASES BY AGE - 3/18 to 6/27

DEATHS BY AGE - 3/28 to 6/27

COVID-19 Outbreaks at Non-Institutional Settings
As of June 28, 2020

Key Takeaways:
• Highest number of cases (178 confirmed cases) were identified at:
  Smithfield
  3049 E Vernon Ave

• Lowest number of cases (3 confirmed cases) were identified at each of these locations:
  Reyes Coca-Cola Bottling, Inc.
  8729 Cleta St, Downey
  Urban Plates
  12746 W Jefferson Blvd, Playa Vista
  Vons Arcadia
  745 W Naomi Ave, Arcadia

Source: Los Angeles County Department of Health
Note: the outbreak list includes Los Angeles County non-residential settings that meet the criteria of (1) five or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID19 case at a worksite, or (2) three or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a setting with vulnerable clients

State Testing Data
As of June 28, 2020 (one day lag)

Key Takeaways:
• 4.0M tests conducted in CA
• +52% in total tests in CA between 6/11 and 6/28

Source: covidtracking.com/
*States are not consistent with updating and reflect a data lag
City of Los Angeles
Tests Performed
As of June 28, 2020
(one day lag)

Key Takeaways:
• At least 871,289 tests have been performed since 3/20
• At least 2,760 tests were performed on 6/28
• 27,157 of the 527,503 results received were positive (5.3%)

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers
Los Angeles Portal Testing vs Total LA County Cases
As of June 28, 2020 (one day lag)

Key Takeaways:

Since the Los Angeles portal testing sites opened to asymptomatic people, the overall number of tests have increased by 469%. Over the same timeframe, total COVID-19 cases have increased by about 322%

The current positive rate at City portal sites is 5.3%

The overall County positive rate is 8.7%

Source: Los Angeles County Department of Health, Los Angeles City
**Hospitalized Patients**
As of June 28, 2020
(one day lag)

---

**Key Takeaways:**
- **1,732** currently hospitalized patients*
- Since 6/22, there has been a **15.5% increase** in hospitalized patients

---
