COVID-19 DATA SUMMARY

Data Snapshot
# Key Takeaways:
The following metrics have seen **undesirable** movement over the past seven days for which data are available: New Cases (vs baseline), Acute Care Bed Capacity, ICU Capacity (vs baseline), and Unemployment Insurance (vs baseline)

The following metrics have seen **desirable** movement over the past seven days: New Cases (vs last week), New Deaths, COVID Positive Test Rate, New Hospitalizations, ICU Capacity (vs last week), Unemployment Insurance (vs last week), and Crime

*Unless otherwise noted, the baseline period is the week of 4/18/20-4/24/20, our highest week in the month of April, first full month of reporting on record

**As of August 18, 2020
***As of August 19, 2020

COVID-19 US Cases - Per Capita State Comparisons
As of August 20, 2020, 3:00 PM

California now has the most cases but in per capita cases, the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: 644.8K cases in California (+5.9K) - 1629 per 100K
11.7K deaths in California (+163) - 29.5 per 100K

#2: 588.6K cases in Florida (+4.6K) - 2763 per 100K
10.2K deaths in Florida (+119) - 47.8 per 100K

#3: 562.6K cases in Texas (+5.3K) - 1960 per 100K
10.8K deaths in Texas (+234) - 37.6 per 100K

#4: 427.8K cases in New York State (+0.6K) - 2189 per 100K
25.3K deaths in New York State (+5) - 129.3 per 100K

#5: 246.7K cases in Georgia (+2.8K) - 2345 per 100K
4.9K deaths in Georgia (+55) - 46.6 per 100K

Rounding out the top ten are: Illinois, Arizona, New Jersey, North Carolina, Louisiana

California ranks ...
#1 in Cases
#22 in Cases per 100K
#3 in Deaths
#28 in Deaths per 100K

Prepared by Mayor’s Innovation Team
Top 5 per capita (per 100K) cases by County:

**Miami-Dade, Florida:** 5,451 cases per 100K  
(148,093 total cases)

**Nueces, Texas:** 4,829 cases per 100K  
(17,494 total cases)

**Cameron, Texas:** 4,334 cases per 100K  
(18,338 total cases)

**Rockland, New York (NYC Metro Area):** 4,318 cases per 100K  
(14,067 total cases)

**Westchester, New York (NYC Metro Area):** 3,779 cases per 100K  
(36,563 total cases)

**Los Angeles, California:** 2,250 cases per 100K  
(225,827 total cases)

Los Angeles County ranks #51 out of 229 counties with 300K+
Top 5 per capita (per 100K) deaths by County:

**New York City, New York:** 283.6 deaths per 100K
(23,643 total deaths)

**Essex, New Jersey (NYC Metro Area):** 264.3 deaths per 100K
(2,112 total deaths)

**Passaic, New Jersey (NYC Metro Area):** 248.1 deaths per 100K
(1,245 total deaths)

**Union, New Jersey (NYC Metro Area):** 242.5 deaths per 100K
(1,349 total deaths)

**Hudson, New Jersey (NYC Metro Area):** 224.4 deaths per 100K
(1,509 total deaths)

**Los Angeles, California:** 53.7 deaths per 100K
(5,392 total deaths)

Los Angeles County ranks #76 out of 229 counties with 300K+
COVID-19 DATA SUMMARY
LA County Update
Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate. The estimated infection rate is 0.92 (ideal is <1.0)
Key Takeaways:
The past seven days have seen an average daily increase of 1,669 new cases.
The past seven days have seen an average daily increase of 41 new deaths.

Page 14
COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases
Key Takeaways:
• 5,920 new cases reported in CA since yesterday (0.9% increase)

• LA County has 35.26% of cases in CA with 1,603 new cases (0.7% increase)

• The City of LA has 14.29% of cases in CA with 573 new cases (0.6% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1.

Prepared by Mayor's Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 1,669 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.
Key Takeaways
Yesterday saw a case increase of 0.7%. The past seven days have seen an average daily case increase of 0.7%.
Key Takeaways:
As of 8/17, the 14-Day Case rate per 100K residents (by episode date, with prison cases) was 280 based on available data. However, due to data issues beginning 7/23, the rate is more likely 280-320.

Note: The case rate was calculated by taking the case data per 100K residents by reporting date from the Los Angeles County Department of Public Health over the a 14-day period with a 3-day lag (e.g. the data for 8/6 run from 7/21-8/3). The main data shown for this report do not exclude prison cases though the difference is about 1 person per 100K.

The State waiver qualifying metric is defined as: “14 day case rate (without prison cases) - The total number of cases diagnosed and reported over a 14-day period divided by the number of people living in the county. This number is then multiplied by 100,000. Due to reporting delay, there is a 3-day lag. Although case rates are often calculated using the date they were reported to the health department, this measure uses the episode date. The episode date is the earliest of several dates and corresponds to the earliest date that the case can be known to have had the infection.”

Source: Los Angeles County Department of Public Health

COVID-19 • LOS ANGELES COUNTY

New & Total Deaths
Key Takeaways:

• 163 new deaths reported in CA from 8/19 to 8/20 (1.4% increase)

• LA County has 46.6% of deaths in CA with 54 new deaths from 8/19 to 8/20 (1.0% increase)

• The City of LA has 20.5% of deaths in CA; 14 new deaths reported from 8/19 to 8/20 (0.6% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 41 new deaths.

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.
Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.
Key Takeaways:
Yesterday saw a death increase of 1.0%

The past 7 days have seen an average daily death increase of 0.7%

COVID-19 Los Angeles County Total Death Increase
As of August 20, 2020, 12:00 PM

Percent Increase in Total Deaths
Total Deaths

Source: Los Angeles County Department of Public Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

Prepared by Mayor’s Innovation Team
Page 23
COVID-19 • LOS ANGELES COUNTY
Testing
Key Takeaways:
Since their respective minimums in late May:

LA County’s positive rate has increased 1.8 percentage points to 9.8%

LA City’s positive rate has increased 2.9 percentage points to 7.2%

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.
Key Takeaways:
• At least **1,183,525** tests have been performed at City of Los Angeles since 3/20

• In LA County overall, at least **2,121,211** tests have been performed since 3/20

• At least **11,189** tests were performed on 8/19

• **81,570** of the 1,153,241 people for which results were received were positive (7.2%)

• NOTE: Several testing sites were closed over the July 4th holiday weekend

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor’s Innovation Team
Key Takeaways:
• The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%

• The overall positive testing reached its lowest rate of 4.3% on 5/31

• The current positive rate is 7.2% and stable

• The 7-day positivity rate (as of 8/17) is 7.1%

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.
Key Takeaways:
- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- The overall cumulative % positive persons tested as of 8/19 is 9.8%.
- The overall cumulative % positive specimens tested as of 8/19 is 6.9%.
- The 7-day average daily % positive persons as of 8/19 is 10.6%.
- The 7-day average daily % positive specimens as of 8/19 is 5.6%.

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.
Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:
- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%
- The positive testing reached its lowest rate of 7.7% on 5/27
- Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.
- The overall cumulative % positive people tested as of 8/13 was 9.9%
- The 7-day average daily % positive persons on 8/13 was 10.4%

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:

• **1,347** currently hospitalized patients

• Since 8/13, there has been a -3.3% decrease in hospitalized patients

---

*Hospitalizations in county press conferences often reported with two-day lag

**There are additional patients in hospitals that are COVID-19-suspected
