DAILY LOS ANGELES
COVID-19 Data Summary

Thursday August 27, 2020
Response Day 168

Prepared by
City of Los Angeles, Mayor Garcetti’s Innovation Team
INDEX

- Data Snapshot
- United States Update
- LA County Update
- New & Total Cases - City + County + State
- New & Total Deaths - City + County + State
- Testing
- Hospitalizations
- Behavior Analysis
- Economic Analysis
Key Takeaways:
The following metrics have seen **undesirable** movement over the past seven days for which data are available: New Cases (vs baseline), Acute Care Bed Capacity (vs baseline), ICU Bed Capacity, and Unemployment Insurance (vs baseline).

The following metrics have seen **desirable** movement over the past seven days: New Cases (vs last week), New Deaths, COVID Positive Test Rate, New Hospitalizations, Acute Care Capacity (vs last week), Unemployment Insurance (vs last week), and LA City Crime.

*Unless otherwise noted, the baseline period is the week of 4/18/20-4/24/20, our highest week in the month of April, first full month of reporting on record.

**As of August 25, 2020**

***As of August 26, 2020

California now has the most cases but in per capita cases, the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: 683.5K cases in California (+4.4K) - 1727 per 100K
12.6K deaths in California (+143) - 31.7 per 100K

#2: 612.0K cases in Florida (+3.3K) - 2873 per 100K
11.0K deaths in Florida (+139) - 51.7 per 100K

#3: 597.7K cases in Texas (+5.6K) - 2082 per 100K
12.1K deaths in Texas (+265) - 42.1 per 100K

#4: 432.1K cases in New York State (+0.8K) - 2211 per 100K
25.3K deaths in New York State (+4) - 129.5 per 100K

#5: 263.1K cases in Georgia (+2.5K) - 2500 per 100K
5.4K deaths in Georgia (+82) - 51.3 per 100K

Rounding out the top ten are: Illinois, Arizona, New Jersey, North Carolina, Tennessee

California ranks ...
#1 in Cases
#22 in Cases per 100K
#3 in Deaths
#28 in Deaths per 100K

COVID-19 DATA SUMMARY

LA County Update
Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate. The estimated infection rate is 0.92 (ideal is <1.0)
Key Takeaways:
The past seven days have seen an average daily increase of 1,424 new cases.
The past seven days have seen an average daily increase of 37 new deaths.

Source: Los Angeles County Department of Public Health
Key Takeaways:

- Data is incomplete with 37.0% of cases and 0.2% of deaths still under investigation

- People 40 and above are overrepresented in cases

- Seniors, Men, Asian Americans, African Americans, and Hispanic/Latino Americans overrepresented in deaths

- 5,236 out of 5,663 deaths had comorbidities (underlying conditions) (92.5%)

Source: Los Angeles County Department of Public Health, US Census Bureau

*Department of Public Health category Under Investigation or Not Otherwise Listed filtered out of analysis Approximations are made on Census data to accommodate county age buckets. Percentage of cases and deaths under investigation is based on the race category

Prepared by Mayor’s Innovation Team
**Key Takeaways:**

From 5/1 to 8/25

- Hispanic/Latino share **increased by 11.5%**
- White share **decreased by 5.1%**
- Asian share **decreased by 3.7%**
- Black share **decrease by 2.1%**
- Other Races share **decreased by 0.4%**
- Native Hawaiian/Pacific Islander share **decreased by 0.2%**
- American Indian/Alaska Native share **increased by 0.1%**
Note: From 7/27, the age categories 18 to 40 and 41 to 65 were broken down into the following categories:

- 18 to 29
- 30 to 49
- 50 to 64

Data on age demographic is missing between 7/22-7/27 as a result of this change.

Source: Los Angeles County Department of Health
*Missing cases/deaths data by demographic from 7/22-7/27

Page 16
COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases
Key Takeaways:

- **4,430** new cases reported in CA since yesterday (0.7% increase)

- LA County has **34.67%** of cases in CA with **1,636** new cases (0.7% increase)

- The City of LA has **14.07%** of cases in CA with **730** new cases (0.8% increase)
Key Takeaways:
The past seven days have seen an average daily increase of 1,424 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.
Key Takeaways

Yesterday saw a case increase of 0.7%. The past seven days have seen an average daily case increase of 0.6%.
Key Takeaways:
As of 8/27, the official State case rate is 185.8.

The State waiver qualifying metric is defined as: “14 day case rate (without prison cases) - The total number of cases diagnosed and reported over a 14-day period divided by the number of people living in the county. This number is then multiplied by 100,000. Due to reporting delay, there is a 3-day lag. Although case rates are often calculated using the date they were reported to the health department, this measure uses the episode date. The episode date is the earliest of several dates and corresponds to the earliest date that the case can be known to have had the infection.”

Starting 8/24, the data show the official state number. Prior to 8/24, an estimate was created using data from the County of Los Angeles’ Surveillance dashboard, which show 14-day cases per 100K residents by episode date, in accordance with the state definition for Los Angeles County. These data do not include Pasadena and Long Beach.

Prepared by Mayor’s Innovation Team
COVID-19 • LOS ANGELES COUNTY

New & Total Deaths
Key Takeaways:

- **143** new deaths reported in CA from 8/26 to 8/27 (**1.2%** increase)

- LA County has **45.4%** of deaths in CA with **38** new deaths from 8/26 to 8/27 (**0.7%** increase)

- The City of LA has **19.8%** of deaths in CA; **12** new deaths reported from 8/26 to 8/27 (**0.5%** increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 37 new deaths.

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Page 24
Key Takeaways:
Yesterday saw a death increase of 0.7%

The past 7 days have seen an average daily death increase of 0.7%

Source: Los Angeles County Department of Public Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
Key Takeaways:
Since their respective minimums in late May:

LA County’s positive rate has increased 1.8 percentage points to 9.8%

LA City’s positive rate has increased 2.9 percentage points to 7.2%

Positive Test Rate (people tested positive rate) - Los Angeles City vs County (by Result Day) As of August 26, 2020 • One day lag

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- At least 1,242,388 tests have been performed at City of Los Angeles since 3/20
- In LA County overall, at least 2,220,997 tests have been performed since 3/20
- At least 11,116 tests were performed on 8/26
- 84,789 of the 1,201,268 people for which results were received were positive (7.2%)

NOTE: Several testing sites were closed over the July 4th holiday weekend

City of Los Angeles* People Tested
As of August 26, 2020 • One day lag

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor’s Innovation Team
Key Takeaways:
- The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%
- The overall positive testing reached its lowest rate of 4.3% on 5/31
- The current positive rate is 7.2% and stable
- The 7-day positivity rate (as of 8/25) is 6.8%

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.

Prepared by Mayor’s Innovation Team
Page 29
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%
- The positive testing reached its lowest rate of 7.7% on 5/27
- The overall cumulative % positive persons tested as of 8/26 is 9.8%
- The overall cumulative % positive specimens tested as of 8/26 is 6.8%
- The 7-day average daily % positive persons as of 8/26 is 10.0%
- The 7-day average daily % positive specimens as of 8/26 is 5.0%

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.
- The overall cumulative % positive people tested as of 8/20 was 9.8%.
- The 7-day average daily % positive persons on 8/20 was 10.6%.

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
COVID-19 • LOS ANGELES COUNTY
Hospitalizations
Key Takeaways:
• 1,168 currently hospitalized patients

• Since 8/20, there has been a -8.8% decrease in hospitalized patients

Source: California Open Data Portal
*Hospitalizations in county press conferences often reported with two-day lag
**There are additional patients in hospitals that are COVID-19-suspected
Key Takeaways:
• At least 17,375 people have been hospitalized since 3/18

• 96 new hospitalizations* as of 8/25 (0.6% increase)

Source: County HavBed Bed Tracking and Los Angeles County Department of Public Health, COVID Tracking Project
*No new hospitalizations update for 7/31

Prepared by Mayor’s Innovation Team
Page 34
Key Takeaways:

- An average of 95 people were hospitalized daily due to COVID-19 between 8/18-8/25

- The new 7-day rolling average decreased by 9.8% compared to last week’s average

Source: County HavBed Bed Tracking and Los Angeles County Department of Public Health Services

*No new hospitalizations update for 7/31

Prepared by Mayor’s Innovation Team
Key Takeaways:
701 total beds

Since last week, there has been a:
- **2.0% increase** in available acute care beds. Surge capacity is 11,482
- **3.7% decrease** in available ICU beds. Surge capacity is 4,067
- **14.2% increase** in available ventilators. Surge capacity is 3,199

County Total Reported Bed Capacity in County: 23,318 Staffed Beds in all Categories

**ICU, Rehab, Unspecified Acute, Coronary Care, NICU, Perinatal, Pediatric, Psych, Skilled Nursing**
Hospital Bed and Equipment Capacity for LA County
As of August 26, 2020 • One day lag
