DAILY LOS ANGELES

COVID-19 Data Summary

Response Day 264
Tuesday December 1, 2020

Prepared by
City of Los Angeles, Mayor Garcetti’s Innovation Team
INDEX

- Data Snapshot
- United States Update
- LA County Update
- New & Total Cases - City + County + State
- New & Total Deaths - City + County + State
- Testing
- Hospitalizations
- City Response and Preparedness
- Economic Analysis
Key Takeaways:
LA County has established thresholds for additional actions if cases or hospitalizations continue to increase:

**Threshold 1**
Cases (5-day avg): 4,000
Total Hospitalizations: 1,750
Outdoor and indoor dining at restaurants, breweries, wineries and bars will be prohibited and these businesses will only be able to offer pick-up and delivery.

**Threshold 2**
Cases (5-day avg): 4,500
Total Hospitalizations: 2,000
A Safer at Home Order will be instituted for three weeks.

A 10:00 p.m. to 6:00 a.m. curfew would be mandated, with essential workers exempt.

Source: Los Angeles County Department of Health
Prepared by Mayor’s Innovation Team
New reopening metrics and tier assignment were previously announced on Tuesdays. On November 16, the State announced that they may start reporting metrics more frequently and on days other than Tuesdays.

All metrics are evaluated on a 7-day lag.

### New COVID-19 positive cases per 100K
7-Day average new positive cases per 100K residents

### Adjusted case rate for tier assignment
An adjustment factor for counties that are testing above or below the state average. This adjusted rate is used for “new case” metric rather than the raw case rate.

### Positivity Rate
7-day average of positive lab-confirmed COVID-19 cases divided by total tests

### Health Equity Metric (starting 10/6)*
The test positivity rate in the Lowest Healthy Places Index Quartile Census Tracts. *California has not released new equity metrics since 11/10

---

### Key Takeaways:

The following metrics have seen **undesirable** movement over the past seven days for which data are available: New Cases, New Deaths (vs last week), 7-Day COVID Positive Test Rate (vs last week), New Hospitalizations, Acute Care Bed Capacity (vs baseline), ICU Bed Capacity (vs baseline), City Crime (vs last week), and Unemployment Insurance Claims (vs baseline).

The following metrics have seen **desirable** movement over the past seven days: New Deaths (vs baseline), 7-Day COVID Positive Test Rate (vs baseline), Acute Care Bed Capacity (vs last week), ICU Bed Capacity (vs last week), Unemployment Insurance Claims (vs last week), and LA City Crime (vs baseline).

*Unless otherwise noted, the baseline period is the week of 4/18/20-4/24/20, our highest week in the month of April, first full month of reporting on record.

*As of 11/30/2020

COVID-19 DATA SUMMARY

United States Update
California again has the most cases and the Midwest remains an epicenter. There have been recent increases in parts of the Southwest as well. The top five states, based on overall cases include:

#1: 1,225.2K cases in California (+12.2K) - 3097 per 100K
19.2K deaths in California (+70) - 48.6 per 100K

#2: 1,184.2K cases in Texas (+16.1K) - 4126 per 100K
21.5K deaths in Texas (+170) - 75.1 per 100K

#3: 991.9K cases in Florida (+8.5K) - 4657 per 100K
18.9K deaths in Florida (+82) - 88.8 per 100K

#4: 738.8K cases in Illinois (+12.5K) - 5798 per 100K
13.1K deaths in Illinois (+146) - 103.1 per 100K

#5: 655.3K cases in New York State (+7.3K) - 3353 per 100K
26.8K deaths in New York State (+69) - 137.2 per 100K

Rounding out the top ten are: Ohio, Georgia, Wisconsin, Michigan, Tennessee

California ranks ...
#1 in Cases
#41 in Cases per 100K

#3 in Deaths
#37 in Deaths per 100K

Prepared by Mayor’s Innovation Team

Page 12
Key Takeaways:
Los Angeles County currently has a **1.9% mortality rate**. The estimated infection rate is **1.27** (ideal is <1.0)
Key Takeaways:
The past seven days have seen an average daily increase of 4,977 new cases.

The past seven days have seen an average daily increase of 30 new deaths.

Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

New Los Angeles County case counts for 10/22-10/24 are inflated due to data backlogs from 10/17-10/21.

Prepared by Mayor’s Innovation Team
Page 15
COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases
Key Takeaways:

- An average of **14,213** Cases reported in CA from 11/24 to 12/1 (1.2% increase)

- LA County accounts for **33.3%** of cases in CA with an average of **4,977** new cases reported from 11/24 to 12/1 (1.3% increase)

- The City of LA accounts for **13.6%** of cases in CA with an average of **1,924** new cases reported from 11/24 to 12/1 (1.3% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an **average daily increase of 4,977 new cases**

Today, **7,593 new cases were reported**. This is the highest single-day total to date.

**Note:** Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.

COVID-19 Los Angeles County Total and New Deaths
As of December 1, 2020, 1:00 PM

Key Takeaways:
The past seven days have seen an average daily increase of 30 new deaths.

Today, 46 new deaths were reported.

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.
Day of outbreak is identified as March 11, with prior cases aggregated to day 1.
LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Page 21
Key Takeaways:
• At least 2,456,142 tests have been performed at City of Los Angeles since 3/20

• In LA County overall, at least 3,760,102 have been tested since 3/20

• At least 27,477 tests were performed on 11/30

• On average, 20,966 tests were performed each day from 11/24 to 11/30

• 158,917 of the 2,400,884 tests for which results were received were positive (6.7%)
Key Takeaways:

LA County’s overall positive rate is currently at 10.1% (for individuals tested)

LA City’s overall positive rate is currently at 6.7% (for all tests)

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.
Key Takeaways:

- The cumulative positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%.

- The overall positive testing reached its lowest rate of 4.3% on 5/31.

- The cumulative positive rate for City of LA site is rising and is currently at 6.7%.

- The 7-day rose to 9.5% (as of 11/29).

Source: City of Los Angeles

*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.

Prepared by Mayor’s Innovation Team

Page 25
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%

- The positive testing reached its lowest rate of 7.7% on 5/27

- The overall cumulative % positive persons tested as of 11/30 is 10.1%

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Page 26
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.
- The overall cumulative % positive rate of specimens tested as of 11/24 was 6.2%.
- The 7-day average daily % positive specimen rate as of 11/24 was 7.0%.

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

COVID-19 • LOS ANGELES COUNTY
Hospitalizations
Key Takeaways:
- 2,439 currently hospitalized patients, a 5.3% increase from yesterday

Source: California Open Data Portal
*Hospitalizations in county press conferences often reported with two-day lag
**There are additional patients in hospitals that are COVID-19-suspected

Prepared by Mayor’s Innovation Team
Page 29
Key Takeaways:

- At least **29,650** people have been hospitalized since 3/18

- **285 new hospitalizations** as of 11/30

- An average of **251** people were hospitalized daily due to COVID-19 between 11/23-11/30

- The new 7-day rolling average increased by **28.1%** compared to last week's average

Source: County HavBed Bed Tracking and Los Angeles County Department of Public Health Services

*No new hospitalizations update for 7/31

Prepared by Mayor’s Innovation Team

Page 30
Key Takeaways:
629 total beds

Since last week, there has been a:
- **14.2% decrease** in available acute care beds. Surge capacity is 11,482
- **16.0% increase** in available ICU beds. Surge capacity is 4,067
- **1.3% decrease** in available ventilators. Surge capacity is 3,199

COVID-19 DATA SUMMARY

City Response and Preparedness
Hotline Services: 311 Calls
As of November 30, 2020 • One-day lag

Source: ITA - 311 Contact Center
Prepared by Mayor's Innovation Team
Key Takeaways:
• 4,700 new claims from 11/8-11/14, including Pandemic Unemployment Assistance (PUA).

• Spiked on 3/28 with 112,000 new claims

• This represents an increase of over 4500% from the weekly average from 1/1 - 3/7

Note: A major PUA backlog was found and reported over the two-week period from 8/23-9/5

New Unemployment Insurance (UI) Claims for the City of Los Angeles
As of November 14, 2020

Source: California EDD
Prepared by Mayor’s Innovation Team
Page 37
Key Takeaways:
- September unemployment (seasonally-adjusted) is estimated at **12.3%** for LA County. This is lower than September’s numbers (15.5%)
- **1,325,185** total claims for Unemployment Insurance (UI) and Pandemic Unemployment Assistance (PUA) in 2020
End of Report
