Detailed Data Report
COVID-19 US Cases and Deaths
As of July 14, 2020 at 2:25PM

New York still has the most cases, but the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: 403.2K cases in New York State (+0.9K) - 2063 per 100K
25.0K deaths in New York State (+5) - 127.9 per 100K

#2: 335.2K cases in California (+9.0K) - 847 per 100K
7.2K deaths in California (+166) - 18.2 per 100K

#3: 291.6K cases in Florida (+9.2K) - 1369 per 100K
4.5K deaths in Florida (+133) - 21.2 per 100K

#4: 275.1K cases in Texas (+10.7K) - 958 per 100K
3.3K deaths in Texas (+87) - 11.6 per 100K

#5: 175.9K cases in New Jersey (+0.4K) - 1974 per 100K
15.6K deaths in New Jersey (+22) - 174.9 per 100K

Rounding out the top ten are: Illinois, Arizona, Georgia, Massachusetts, Pennsylvania

California ranks ...
#2 in Cases
#26 in Cases per 100K
#5 in Deaths
#29 in Deaths per 100K

COVID-19 Los Angeles County Total Cases and Total Deaths, Past 7 Days
As of July 14, 2020, Noon

Key Takeaways:
Los Angeles County currently has a 2.8% mortality rate.

New cases number for 7/7 include around ~2K backlogged cases from a single lab covering the time period from 7/2-7/5. Results for 7/8 do not include results for this same lab.

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19
Los Angeles County
Total New Cases
As of July 14, 2020, Noon

Key Takeaways:
The past seven days have seen an average daily increase of 2,859 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.

Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 Los Angeles County Total Case Increase
As of July 14, 2020, Noon

Key Takeaways
Yesterday saw a case increase of 3.1%

The past seven days have seen an average daily case increase of 2.2%

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
Key Takeaways:
The past seven days have seen an average daily increase of 47 new deaths.

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 Los Angeles County Total Death Increase
As of July 14, 2020, Noon

Key Takeaways:
Yesterday saw a death increase of 1.9%
The past 7 days have seen an average daily death increase of 1.2%

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

**Cases:**
**Los Angeles vs. California**
As of July 14, 2020, 1:00 PM

**Key Takeaways:**
- 8,982 new cases reported in CA since yesterday (2.8% increase)
- LA County has 41.86% of cases in CA with 4,244 new cases (3.1% increase)
- The City of LA has 17.33% of cases in CA with 1,507 new cases (2.7% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1.
Deaths: Los Angeles vs. California
As of July 14, 2020, 1:00 PM

Key Takeaways:
- **166** new deaths reported in CA from 7/13 to 7/14 (2.4% increase)
- LA County has **53.9%** of deaths in CA with **73** new deaths from 7/13 to 7/14 (1.9% increase)
- The City of LA has **25.6%** of deaths in CA; **21** new deaths reported from 7/13 to 7/14 (1.1% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.
Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.
COVID Cases and Death Demographics
As of July 12, 2020
(two-day lag)

Key Takeaways:
- Data is incomplete with 39.5% of cases and 0.6% of deaths still under investigation
- People 18-65 are overrepresented in cases
- Seniors, Men, Asian Americans, and African Americans are overrepresented in deaths
- 3,558 out of 3,822 deaths had comorbidities (underlying conditions) (93.1%)

Source: Los Angeles County Department of Public Health, US Census Bureau
*Department of Public Health category Under Investigation or Not Otherwise Listed filtered out of analysis
Approximations are made on Census data to accommodate county age buckets.
Percentage of cases and deaths under investigation is based on the race category
Share of LA County Deaths by Race
As of July 12, 2020 (two-day lag)

Key Takeaways:
From 5/1 to 7/12

- Hispanic/Latino share increased by 6.9%
- White share decreased by 2.6%
- Asian share decreased by 3.0%
- Black share decrease by 1.2%
- Other Races share decreased by 0.1%
- Native Hawaiian/Pacific Islander share decreased by 0.1%
- American Indian/Alaska Native share increased by 0.1%

Source: Los Angeles County Department of Health
*Missing cases/deaths data by demographic from 7/2-7/3
Cases & Deaths by Age
As of July 12, 2020
(two-day lag)

CASES BY AGE - 3/18 to 7/12

City of Los Angeles*
Test Performed
As of July 13, 2020
(one-day lag)

Key Takeaways:
• At least 1,074,955 tests have been performed at City of Los Angeles portal sites since 3/20

• In LA County overall, at least 1,338,806 tests have been performed in the County of Los Angeles since 3/20

• At least 17,815 tests were performed on 7/13

• 38,886 of the 683,699 results received were positive (6.1%)

• NOTE: Several testing sites were closed on the holiday weekend

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. Testing numbers also include sites outside City of Los Angeles boundaries, which are managed by the LA City portal.
City of Los Angeles* Tests Performed vs Positive Rate
As of July 13, 2020 (one-day lag)

Key Takeaways:
- The positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%
- The positive testing reached its lowest rate of 4.3% on 5/31
- The current positive rate is 6.1% and trending upward

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.
County of Los Angeles
Tests Performed vs
Positive Rate
As of July 13, 2020
(one-day lag)

Key Takeaways:
• The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%
• The positive testing reached its lowest rate of 7.7% on 5/27
• The overall positive rate as of 7/13 is 9.4%
• The 7-day average positive rate as of 7/13 is 13.9%

Source: Los Angeles County Department of Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.
Positive Test Rate - Los Angeles City vs County
As of July 13, 2020
(one-day lag)

Key Takeaways:
Since their respective minimums in late May:

LA County’s positive rate has increased 1.4 percentage points to 9.4%
LA City’s positive rate has increased 1.7 percentage points to 6.1%

Source: Los Angeles County Department of Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.
