COVID-19 Los Angeles County Total Cases and Total Deaths, Past 7 Days
As of April 29, 2020, Noon

Currently, Los Angeles County has a 4.7% mortality rate.
The past 7 days have seen an average daily increase of 886 new cases.

The current case doubling rate is 9.7 with a 3-day average of 16.9.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.
