Key Takeaways from Texas Medical Association:

Lowest risk activities include:
- Opening the Mail
- Getting Takeout from a Restaurant
- Pumping Gasoline
- Playing Tennis
- Going Camping

Highest risk activities include:
- Eating at a Buffet
- Working Out at the Gym
- Going to an Amusement Park
- Going to a Movie Theater
- Attending a Large Concert
- Going to a Sports Stadium
- Attending a Religious Service with 500+ Worshipers
- Going to a Bar
American Airlines will lay off 19,000 workers if it doesn’t get additional federal help

F.D.A. Allows Expanded Use of Plasma to Treat Coronavirus Patients

The move came on the eve of the Republican convention and after President Trump pressed the agency to move faster to address the pandemic.

Hong Kong reports first confirmed coronavirus reinfection

In stunning reversal, CDC abruptly changes position on when to get tested

Adm. Brett Giroir claimed President Trump wasn’t involved.

College campuses face explosion of COVID-19 cases — and challenges to get students to follow safety protocols

The University of Alabama reported more than 550 people tested positive for the coronavirus since classes began one week ago.

New Virus Hot Spots: U.S. Islands from Hawaii to Puerto Rico

U.S. islands in the Caribbean and the Pacific have growing cases of the coronavirus, which can spike even in places far removed from urban centers when controls are relaxed.
COVID-19 DATA SUMMARY

County Projections
KEY TAKEAWAYS:

• The number of new patients with COVID-19 requiring hospitalization each day across Los Angeles County appears to be decreasing.

• The transmission number ("R") is now estimated to be 0.92 with an uncertainty of 0.85 to 0.99. Last week the estimate was also 0.92 with an uncertainty of 0.83 to 1.01.

• Based on the current estimate for R, the current number of available hospital beds, currently staffed ICU beds, and available ventilators in Los Angeles County are likely adequate over the next 4 weeks.

• The model suggests that about 1 in 7.5 Los Angeles County residents have had COVID-19.

HOW MANY IN LOS ANGELES ARE INFECTIOUS TO OTHERS?

The model suggest that about 0.13% of everyone in Los Angeles County is currently infected and infectious to others (uncertainty of 0.08% to 0.21%).

This suggests about 1 in 775 Los Angeles County residents are currently infectious to others (uncertainty between 1 in 1,290 and 1 in 480). Last week this estimate was 1 in 650.
Effective Transmission Number “R”
As of August 24, 2020

Note: We have adjusted the R that we present to account for the fraction of the population that is presumed to be immune to reinfection. At the beginning of the pandemic, this fraction was essentially zero so this would not have made any difference. But as more people have been infected, and are presumed to have immunity, we are presenting an R that includes this factor.

COVID-19 DATA SUMMARY

United States Update
California now has the most cases but in per capita cases, the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

#1: 679.1K cases in California (+6.0K) - 1716 per 100K 12.4K deaths in California (+150) - 31.4 per 100K
#2: 608.7K cases in Florida (+3.2K) - 2857 per 100K 10.9K deaths in Florida (+155) - 51.0 per 100K
#3: 592.1K cases in Texas (+5.4K) - 2063 per 100K 11.8K deaths in Texas (+229) - 41.1 per 100K
#4: 431.3K cases in New York State (+0.6K) - 2207 per 100K 25.3K deaths in New York State (+8) - 129.5 per 100K
#5: 260.6K cases in Georgia (+2.2K) - 2477 per 100K 5.3K deaths in Georgia (+49) - 50.5 per 100K

Rounding out the top ten are:
Illinois, Arizona, New Jersey, North Carolina, Tennessee

California ranks ...
#1 in Cases
#22 in Cases per 100K
#3 in Deaths
#28 in Deaths per 100K

COVID-19 US Cases - Per Capita County Comparison (Counties >300K ppl)
As of August 25, 2020, 8:00 PM • One day lag

Top 5 per capita (per 100K) cases by County:

Miami-Dade, Florida: 5,646 cases per 100K (153,385 total cases)
Nueces, Texas: 5,065 cases per 100K (18,349 total cases)
Cameron, Texas: 4,694 cases per 100K (19,862 total cases)
Rockland, New York (NYC Metro Area): 4,343 cases per 100K (14,149 total cases)
Westchester, New York (NYC Metro Area): 3,798 cases per 100K (36,742 total cases)

Los Angeles, California: 2,329 cases per 100K (233,777 total cases)
Los Angeles County ranks #51 out of 229 counties with 300K+

Source: Los Angeles County Department of Health, Johns Hopkins University
Prepared by Mayor’s Innovation Team
Page 23
Top 5 per capita (per 100K) deaths by County:

**New York City, New York:** 283.9 deaths per 100K (23,666 total deaths)

**Essex, New Jersey (NYC Metro Area):** 264.7 deaths per 100K (2,115 total deaths)

**Passaic, New Jersey (NYC Metro Area):** 248.9 deaths per 100K (1,249 total deaths)

**Union, New Jersey (NYC Metro Area):** 242.7 deaths per 100K (1,350 total deaths)

**Hudson, New Jersey (NYC Metro Area):** 224.6 deaths per 100K (1,510 total deaths)

**Los Angeles, California:** 55.8 deaths per 100K (5,605 total deaths)

Los Angeles County ranks #78 out of 229 counties with 300K+ population.
COVID-19 DATA SUMMARY
LA County Update
Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate. The estimated infection rate is 0.92 (ideal is <1.0)
Key Takeaways:
The past seven days have seen an average daily increase of 1,419 new cases

The past seven days have seen an average daily increase of 40 new deaths

Los Angeles County Update

As of August 26, 2020, Noon

New Cases (7-Day Rolling Average)
New Deaths (7-Day Rolling Average)

Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

Prepared by Mayor’s Innovation Team
Page 27
Key Takeaways:
• Data is incomplete with 37.1% of cases and 0.2% of deaths still under investigation
• People 40 and above are overrepresented in cases
• Seniors, Men, Asian Americans, and African Americans overrepresented in deaths
• 5,182 out of 5,605 deaths had comorbidities (underlying conditions) (92.5%)

Source: Los Angeles County Department of Public Health, US Census Bureau
*Department of Public Health category Under Investigation or Not Otherwise Listed filtered out of analysis Approximations are made on Census data to accommodate county age buckets. Percentage of cases and deaths under investigation is based on the race category

Prepared by Mayor’s Innovation Team
Key Takeaways:
From 5/1 to 8/24

- Hispanic/Latino share increased by 11.5%
- White share decreased by 5.2%
- Asian share decreased by 3.8%
- Black share decreased by 2.1%
- Other Races share decreased by 0.1%
- Native Hawaiian/Pacific Islander share decreased by 0.2%
- American Indian/Alaska Native share increased by 0.1%

Page 31
Key Takeaways:
• As of August 25, there have been outbreaks at 400 non-residential locations in Los Angeles with at least three cases for a total of 4,782 confirmed cases and 528 suspected cases

• Significant new outbreaks have been identified at the following locations:
  
  **LA County Sheriff’s Department Academy** - 53 confirmed cases
  
  **99 Cent Only Stores Warehouse and Corporate Office** - 28 confirmed cases
  
  **Antex Knitting Mills** - 25 confirmed cases
  
  **Certified Credit Union** - 22 confirmed cases

Note: The outbreak list includes Los Angeles County non-residential settings that meet the criteria of (1) five or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a worksite, or (2) three or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a setting with vulnerable clients.
COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases
Key Takeaways:
• 6,004 new cases reported in CA (0.9% increase)
• LA County has 34.66% of cases in CA with 1,642 new cases (0.7% increase)
• The City of LA has 14.04% of cases in CA; 666 new cases reported (0.7% increase)
Key Takeaways:
The past seven days have seen an average daily increase of 1,419 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.
Key Takeaways
Yesterday saw a case increase of 0.7%

The past seven days have seen an average daily case increase of 0.6%

Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
**Key Takeaways:**
As of 8/26, the official State case rate is 191.2.

The State waiver qualifying metric is defined as: “14 day case rate (without prison cases) - The total number of cases diagnosed and reported over a 14-day period divided by the number of people living in the county. This number is then multiplied by 100,000. Due to reporting delay, there is a 3-day lag. Although case rates are often calculated using the date they were reported to the health department, this measure uses the episode date. The episode date is the earliest of several dates and corresponds to the earliest date that the case can be known to have had the infection.”

Starting 8/24, the data show the official state number. Prior to 8/24, an estimate was created using data from the County of Los Angeles’ Surveillance dashboard, which show 14-day cases per 100K residents by episode date, in accordance with the state definition for Los Angeles County. These data do not include Pasadena and Long Beach.

Source: Los Angeles County Department of Public Health, California Department of Public Health (CDPH)
Prepared by Mayor’s Innovation Team
Key Takeaways
As of August 25, 2020 New York State has had 2,207 cases per 100K.

As of August 26, Los Angeles County has had 2,345 cases per 100K and is now above New York State.

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
Key Takeaways:
• **150** new deaths reported in CA from 8/25 to 8/26 (1.2% increase)

- LA County has **45.6%** of deaths in CA with **58** new deaths from 8/25 to 8/26 (1.0% increase)

- The City of LA has **20.0%** of deaths in CA; **19** new deaths reported from 8/25 to 8/26 (0.8% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.
Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor's Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 40 new deaths.
Key Takeaways:
Yesterday saw a death increase of 1.0%

The past 7 days have seen an average daily death increase of 0.7%

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.
COVID-19 • LOS ANGELES COUNTY
Testing
Key Takeaways:
Since their respective minimums in late May:

LA County’s positive rate has increased 1.9 percentage points to 9.8%

LA City’s positive rate has increased 2.9 percentage points to 7.2%

Source: Los Angeles County Department of Health. Recent dates are incomplete due to lags in reporting.
Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:
• At least **1,231,271** tests have been performed at City of Los Angeles since 3/20

• In LA County overall, at least **2,207,784 tests** have been performed since 3/20

• At least **9,660** tests were performed on 8/25

• **84,789** of the 1,201,268 people for which results were received were positive (7.2%)

• NOTE: Several testing sites were closed over the July 4th holiday weekend

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor’s Innovation Team
Page 45
Key Takeaways:

- The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%
- The overall positive testing reached its lowest rate of 4.3% on 5/31
- The current positive rate is 7.2% and stable
- The 7-day positive rate as of 8/23 is 6.9% and stable

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.

Prepared by Mayor’s Innovation Team
Key Takeaways:
• The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%
• The positive testing reached its lowest rate of 7.7% on 5/27
• The overall cumulative % positive persons tested as of 8/25 is 9.8%
• The overall cumulative % positive specimens tested as of 8/25 is 6.8%
• The 7-day average daily % positive persons as of 8/25 is 10.5%
• The 7-day average daily % positive specimens as of 8/25 is 5.3%

Source: Los Angeles County Department of Health. Recent dates are incomplete due to lags in reporting. Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Page 47
Key Takeaways:

- The overall positive rate for Los Angeles County peaked on 4/8 with a rate of 13.4%.
- The positive testing reached its lowest rate of 7.7% on 5/27.
- Given delays in testing results, 7-day positive average rates are more stable when viewed after a week.
- The overall cumulative % positive people tested as of 8/19 was 9.8%.
- The 7-day average daily % positive persons on 8/19 was 10.1%.

Source: Los Angeles County Department of Public Health. Recent dates are incomplete due to lags in reporting.

Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor's Innovation Team
Key Takeaways:
• 10.8M tests conducted in CA
• +7% in total tests in CA between 8/19 and 8/25

Source: covidtracking.com/
*States are not consistent with updating and reflect a data lag

Prepared by Mayor’s Innovation Team
Page 49
COVID-19 • LOS ANGELES COUNTY
Hospitalizations
Key Takeaways:

• 1,168 currently hospitalized patients

• Since 8/19, there has been a -13.3% decrease in hospitalized patients

Source: California Open Data Portal

*Hospitalizations in county press conferences often reported with two-day lag

**There are additional patients in hospitals that are COVID-19-suspected
Key Takeaways:

- At least 17,158 people have been hospitalized since 3/18

- 85 new hospitalizations* as of 8/24 (0.5% increase)

*No new hospitalizations update for 7/31

Source: County HavBed Bed Tracking and Los Angeles County Department of Public Health, COVID Tracking Project

Prepared by Mayor's Innovation Team

Page 52
Key Takeaways:

• An average of 96 people were hospitalized daily due to COVID-19 between 8/17-8/24

• The new 7-day rolling average decreased by 9.9% compared to last week's average
Key Takeaways:
631 total beds

Since last week, there has been a:
• 5.8% increase in available acute care beds. Surge capacity is 11,482
• 10.6% increase in available ICU beds. Surge capacity is 4,067
• 6% increase in available ventilators. Surge capacity is 3,199

This is self reported data subject to error, represents 70 designated 9-1-1 receiving hospitals
*No data for 7/31 currently available

Prepared by Mayor’s Innovation Team
Page 56
**Key Takeaways:**

- Current mask stock is **170,931**
- The stock of masks decreased **5.6%** from last week
- The projected 3-month need is **660,765**
- The projected 6-month need is **1,387,607**

---

Source: Los Angeles EOC

* Includes LAFD, LAPD, RAP/Shelter Staff, Harbor, Personnel, GSD, Street Services, GSD, LAWA, ITA, DOT, Aging.
** The burn rate for LAFD decreased due to revised standards for reuse. LAPD burn rate = 1000/day; LAFD = 1500/day; LAWA=1875/day.
*** The six-month need is more than double the three-month need because departments estimate that their burn rate may increase with time.
COVID-19 DATA SUMMARY
Mayor’s Office Initiatives
Key Takeaways:
- At least 5,653 visits made as of 8/24*

- DSW Visited Locations: 3,132
- LAPD Visited Applications: 2,521
- Complaint Applications: 107
- DWP Checks: 389
- DWP Shut Offs: 4

*Program on hold from May 29-July 21

COVID-19 • Los Angeles City Overview

Economic Analysis
Key Takeaways:

• 50.4K new claims from 7/26-8/1, including Pandemic Unemployment Assistance (PUA)

• Spiked on 3/28 with 112K new claims

• This represents an increase of over 4500% from the weekly average from 1/1 - 3/7
Key Takeaways:
- June unemployment (seasonally-adjusted) estimated at 19.4% for LA County (19.8% for LA City). Both numbers are slightly lower than last month but much higher than the 2019 equivalent.

- **1,041,427** total claims for Unemployment Insurance (UI) and Pandemic Unemployment Assistance (PUA) in 2020
% Change vs 2019: 10.5% decrease
- Jan to July 2019: $339,410,760
- Jan to July 2020: $303,838,270

% Change for COVID-19 months: 22.9% decrease
- March to July 2019: $237,903,333
- March to July 2020: $190,922,265

Key Takeaways:
Sales Tax Revenues from 2019-2020
- July 2020 decreased by 8.7%
- June 2020 decreased by 13.1%
- May 2020 decreased by 50.4%
- April 2020 decreased by 17.4%
- March 2020 decreased by 9.6%
- February 2020 increased by 22.5%
- January 2020 decreased by 2.1%
Key Takeaways:
Since February 2020:

- 91% increase in CalFresh applications (coverage expanded in April 2020)
- 10% decrease in Medi-Cal applications
- 15% decrease in General Relief applications
- 32% increase in CalWORKs applications
- 19% decrease in IHSS applications
- 8% increase in CAPI applications
