KEY TAKEAWAYS:

- The number of new patients with COVID-19 requiring hospitalization each day across Los Angeles County now appears to be decreasing slightly. The number of daily new cases is starting to approach the lower numbers seen in May.

- The transmission number (“R”) is now estimated to be 0.91 with an uncertainty of 0.83 to 0.99. Last week the estimate was 0.92 with an uncertainty of 0.86 to 0.98.

- Based on the current estimate for R, the current number of available hospital beds and available ventilators in Los Angeles County are likely adequate over the next 4 weeks. The number of available, currently staffed ICU beds also appears adequate but is more limited and could potentially become inadequate over the next 4 weeks if R and the associated transmission increases.

HOW MANY IN LOS ANGELES ARE INFECTIOUS TO OTHERS?

The model suggest that about 0.19% (uncertainty of 0.12% to 0.31%) of everyone in Los Angeles County is currently infected and infectious to others. This suggests about 1 in 510 (between 1 in 860 and 1 in 320) Los Angeles County residents are currently infectious to others. Last week this estimate was 1 in 450.

The projection for future ICU bed utilization is a 10% decrease from what would have been expected early in the epidemic with the same number of hospital admissions

- The projection for future ventilator utilization is a 25% decrease from what would have been expected early in the epidemic with the same number of hospital admissions
Effective Transmission Number “R”
As of Aug 3, 2020

Note: We have adjusted the R that we present to account for the fraction of the population that is presumed to be immune to reinfection. At the beginning of the pandemic, this fraction was essentially zero so this would not have made any difference. But as more people have been infected, and are presumed to have immunity, we are presenting an R that includes this factor.

COVID-19 DATA SUMMARY
United States Update
As of August 5, 2020, 3:00 PM

California now has the most cases but in per capita cases, the South is now an epicenter, particularly Florida and Texas. The top five states, based on total cases, include:

1. **California**
   - 524.7K cases (+5.3K)
   - 9.7K deaths (+202)

2. **Florida**
   - 502.7K cases (+5.4K)
   - 7.8K deaths (+225)

3. **Texas**
   - 459.9K cases (+8.7K)
   - 7.5K deaths (+236)

4. **New York State**
   - 418.2K cases (+0.6K)
   - 25.2K deaths (+4)

5. **Georgia**
   - 201.7K cases (+3.8K)
   - 4.0K deaths (+142)

Rounding out the top ten are: **Illinois, New Jersey, Arizona, North Carolina, Louisiana**

California ranks ...
- **#1** in Cases
- **#24** in Cases per 100K
- **#3** in Deaths
- **#29** in Deaths per 100K

Source: Los Angeles County Department of Health, COVID Tracking Project
Prepared by Mayor’s Innovation Team
Top 5 per capita (per 100K) cases by County:

Miami-Dade, Florida: 4,592 cases per 100K (124,759 total cases)
Rockland, New York (NYC Metro Area): 4,264 cases per 100K (13,893 total cases)
Westchester, New York (NYC Metro Area): 3,726 cases per 100K (36,049 total cases)
Nueces, Texas: 3,537 cases per 100K (12,813 total cases)
Passaic, New Jersey (NYC Metro Area): 3,494 cases per 100K (17,532 total cases)

Los Angeles, California: **1,950 cases** per 100K (195,805 total cases)

Los Angeles County ranks #52 out of 229 counties with 300K+
Top 5 per capita (per 100K) deaths by County:

**New York City, New York:** 282.6 deaths per 100K (23,556 total deaths)

**Essex, New Jersey (NYC Metro Area):** 263.6 deaths per 100K (2,106 total deaths)

**Passaic, New Jersey (NYC Metro Area):** 247.7 deaths per 100K (1,243 total deaths)

**Union, New Jersey (NYC Metro Area):** 242.3 deaths per 100K (1,348 total deaths)

**Hudson, New Jersey (NYC Metro Area):** 223.5 deaths per 100K (1,503 total deaths)

Los Angeles, California: 47.4 deaths per 100K (4,760 total deaths)
Los Angeles County ranks #75 out of 229 counties with 300K+
COVID-19 DATA SUMMARY

LA County Update
Key Takeaways:
Los Angeles County currently has a 2.4% mortality rate. The estimated infection rate is 0.91 (ideal is <1.0)

New cases numbers since 7/23 are affected by data backlogs from certain labs, which can cause under-reporting on certain days, followed by over-reporting once results are received.
Key Takeaways:
The past seven days have seen an average daily increase of 2,134 new cases

The past seven days have seen an average daily increase of 46 new deaths

New cases numbers since 7/23 are affected by data backlogs from certain labs, which can cause under-reporting on certain days, followed by over-reporting once results are received.

Source: Los Angeles County Department of Health

Note: Between July 3-5, the County took their systems offline for an upgrade. Additionally, several testing sites were closed and at least one major lab did not report case results. Deaths were likely undercounted because the necessary verification steps extended beyond the weekend due to holiday. As a result, all data during this time period is skewed.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- Data is incomplete with 37.7% of cases and 0.4% of deaths still under investigation.

- People 18-49 and Hispanic/Latinos are overrepresented in cases.

- Seniors, Men, and African Americans are overrepresented in deaths.

- 4,403 out of 4,758 deaths had comorbidities (underlying conditions) (92.5%).

Source: Los Angeles County Department of Public Health, US Census Bureau

*Department of Public Health category Under Investigation or Not Otherwise Listed filtered out of analysis. Approximations are made on Census data to accommodate county age buckets. Percentage of cases and deaths under investigation is based on the race category.
Key Takeaways:
From 5/1 to 8/3

- Hispanic/Latino share increased by 9.8%
- White share decreased by 4.6%
- Asian share decreased by 3.6%
- Black share decreased by 1.5%
- Other Races share decreased by 0.1%
- Native Hawaiian/Pacific Islander share decreased by 0.1%
- American Indian/Alaska Native share increased by 0.2%
**Key Takeaways:**
Positive Testing Rates from 6/23 to 7/25

- Hispanic/Latino—14.2%
- White—3.4%
- Asian—3.3%
- Black—6.3%
- Other—8.2%
- Native Hawaiian/Pacific Islander—4.8%
- American Indian/Alaska Native—12.1%
- Multi-racial—3.9%

- Overall Positive Rate: **10.4%**

---

Source: Healthevna
*Only data with complete race/ethnicity information was included*

Prepared by Mayor’s Innovation Team
Page 26
Key Takeaways:
- Highest number of cases were identified at:
  - LA Apparel - 3 buildings (384 confirmed cases overall)
  - Smithfield - Vernon (241 confirmed cases)
  - Ralphs Ice Plant and Warehouse - Compton (114 confirmed cases)

Within City of Los Angeles boundaries, the highest outbreaks outside LA Apparel were identified at:
  - Moulton Logistics Management (43 confirmed cases)
  - Anthony, Inc. (27 confirmed cases)

Source: Los Angeles County Department of Health

Note: the outbreak list includes Los Angeles County non-residential settings that meet the criteria of (1) five or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a worksite, or (2) three or more laboratory-confirmed COVID-19 cases or symptomatic persons with at least 1 laboratory-confirmed COVID-19 case at a setting with vulnerable clients.
COVID-19 • CITY + COUNTY + STATE VIEW

New & Total Cases
Key Takeaways:

- **5,295** new cases reported in CA since yesterday (1.0% increase)

- LA County has **37.71%** of cases in CA with **2,347** new cases (1.2% increase)

- The City of LA has **15.41%** of cases in CA with **941** new cases (1.2% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, LA County Department of Public Health, COVIDTracking.com, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1

Prepared by Mayor’s Innovation Team
Key Takeaways:
The past seven days have seen an average daily increase of 2,134 new cases.

Note: Daily numbers may show a discrepancy when performing basic addition. This is based on the fact that the County is performing ongoing investigation into cases and updating their daily case numbers but not updating historic case numbers.

Key Takeaways
As of August 5, 2020 New York State has had 2,140 cases per 100K. Los Angeles County has had 1,971 cases per 100K.
COVID-19 • LOS ANGELES COUNTY

New & Total Deaths
Key Takeaways:
• 202 new deaths reported in CA from 8/4 to 8/5 (2.1% increase)

• LA County has 49.7% of deaths in CA with 68 new deaths from 8/4 to 8/5 (1.4% increase)

• The City of LA has 22.7% of deaths in CA; 19 new deaths reported from 8/4 to 8/5 (0.9% increase)

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times.

Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.
Key Takeaways:
The past seven days have seen an average daily increase of 46 new deaths.

Source: Los Angeles County Department of Public Health, Johns Hopkins Center for Systems Science and Engineering GitHub repo, and the LA Times. Day of outbreak is identified as March 11th, with prior cases aggregated to day 1. LA City death count lags several days.

Prepared by Mayor’s Innovation Team
Key Takeaways:
Yesterday saw a death increase of 1.4%

The past 7 days have seen an average daily death increase of 1.0%
COVID-19 • LOS ANGELES COUNTY
Testing
Key Takeaways:

Since their respective minimums in late May:

LA County’s positive rate has increased 1.9 percentage points to 9.9%

LA City’s positive rate has increased 2.8 percentage points to 7.1%

Asymptomatic Testing Begins at City Sites

Source: Los Angeles County Department of Health. Recent dates are incomplete due to lags in reporting.

Persons Tested are derived from Electronic Lab Reporting (ELR) data. Positive Persons will not equal total cases because not all laboratories report results through ELR.

Prepared by Mayor’s Innovation Team
Key Takeaways:
• At least 1,016,446 tests have been performed at City of Los Angeles since 3/20

• In LA County overall, at least 1,818,181 tests have been performed since 3/20

• At least 16,516 tests were performed on 8/4

• 68,210 of the 936,618 people for which results were received were positive (7.1%)

• NOTE: Several testing sites were closed over the July 4th holiday weekend

City of Los Angeles* People Tested
As of August 4, 2020 • One day lag

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers.

Prepared by Mayor’s Innovation Team
Key Takeaways:

- The overall positive testing rate for City of LA sites peaked on 4/27 with a rate of 7.8%
- The overall positive testing reached its lowest rate of 4.3% on 5/31
- The current positive rate is 7.1% and trending upward

Source: City of Los Angeles
*Public test registration. It does not include registration of critical city employees, first responders, and health care providers. These testing numbers only include sites within the City of Los Angeles boundaries.

---

**Source:** Los Angeles EOC

* Includes LAFD, LAPD, RAP/Shelter Staff, Harbor, Personnel, GSD, Street Services, GSD, LAWA, ITA, DOT, Aging.

** The burn rate for LAFD decreased due to revised standards for reuse. LAPD burn rate = 1000/day; LAFD = 1500/day; LAWA=1875/day.

*** The six-month need is more than double the three-month need because departments estimate that their burn rate may increase with time.
COVID-19 DATA SUMMARY

Mayor’s Office Initiatives
Key Takeaways:
- At least 5,486 visits made as of 8/4:
  - DSW Visited Locations: 2,999
  - LAPD Visited Applications: 2,487
  - Complaint Applications: 105
  - DWP Checks: 381
  - DWP Shut Offs: 2

BEHAVIORAL ANALYSIS

Summary of Apple Mobility Data for Los Angeles
As of August 3, 2020 • Two day lag

Key Takeaways:

• Walking direction requests have increased by 10%

• Driving direction requests have increased by 8%

• Transit direction requests have decreased by 51%

Source: Apple COVID-19 Mobility Trends Report
Prepared by Mayor’s Innovation Team
Page 61
Key Takeaways:
The percentage of people staying home jumped significantly during the weekend of 3/14 coinciding with closures of various public locations.

As of 8/1, 38% of residents were staying home.
COVID-19 • Los Angeles City Overview

Economic Analysis
Key Takeaways:
• 41.1K new claims from 6/28-7/4, including Pandemic Unemployment Assistance (PUA)
• Spiked on 3/28 with 112K new claims
• This represents an increase of over 4500% from the weekly average from 1/1 - 3/7
Key Takeaways:
• June unemployment (seasonally-adjusted) estimated at 19.4% for LA County (19.8% for LA City). Both numbers are slightly lower than last month but much higher than the 2019 equivalent.

• 829.5K total claims for Unemployment Insurance (UI) and Pandemic Unemployment Assistance (PUA) in 2020.
Cumulative Insurance Claims for the City of Los Angeles  
As of June, 2020

% Change vs 2019: 10.8% decrease  
- Jan to June 2019: $286,795,773  
- Jan to June 2020: $255,807,415

% Change for COVID-19 months: 22.9% decrease  
- March to June 2019: $185,288,346  
- March to June 2020: $142,891,410

Key Takeaways:  
Sales Tax Revenues from 2019-2020
- June 2020 decreased by 13.1%  
- May 2020 decreased by 50.4%  
- April 2020 decreased by 17.4%  
- March 2020 decreased by 9.6%  
- February 2020 increased by 22.5%  
- January 2020 decreased by 2.1%
